

Certified Metaverse Security Consultant (CMSC)™

Table of Contents

1

CRD 1 - Metaverse Security Overview

08	Introduction
09	Metaverse Examples
10	Foundations of the Metaverse
12	Use Cases of the Metaverse
13	Criticisms of the Metaverse
14	Metaverse Security Challenges
16	Future Metaverse Security Considerations

2

CRD 2 - Web3 Model and Architecture

22	Metaverse Architecture
24	Key Characteristics of the Metaverse
26	Enabling Technologies of the Metaverse
28	The Web3 Model
29	Layer 0: Core Technologies and Protocols
30	Layer1: Blockchain Protocol
33	Layer2: Infrastructure Layer
34	Layer3: Use Case Layer
36	Layer 4: Access Layer
37	An Evolving Landscape

3**CRD 3 - Metaverse Security Threats**

40	I. Identity-Related Threats
41	II. Data-Related Threats
42	III. Privacy Threats
44	IV. Network-Related Threats
45	V. Economy-Related Threats
46	VI. Threats to Physical World and Human Society
47	VII. Governance-Related Threats

4**CRD 4 - Metaverse Security Risks**

49	Blockchain and Smart Contracts
50	Blockchain Benefits
51	Why Blockchain is Important
51	Who should be concerned with Blockchain Security
52	Blockchain Security Risks and Threats
55	Blockchain Endpoint Vulnerabilities
56	Smart Contract Security
57	Why is the Security of Smart Contracts Important
57	Smart Contract Risks and Threats
59	How Cybersecurity Experts can manage Smart Contract Security Risks
60	Decentralized Identity And DApps
60	Introduction to Decentralized Identity
61	Introduction to Decentralized Applications
62	Benefits of Decentralization
63	Why Decentralized Identity and DApp Security is Important
64	Decentralized Identity/DApp Risks and Threats

65	How Cybersecurity Experts can mitigate Risks
67	Decentralized Identity And Regulation Compliance
67	Impact of Distributed Identity in Web3 and Metaverse
67	Major Compliance Requirements
68	Issues of Compliance professionals need to be Aware of
69	How can Cybersecurity Professionals Comply with Identity Regulations
70	NFT And Crypto
71	Why NFT and Crypto Security is Important
72	NFT and Crypto Security Risks
73	How Cybersecurity experts can manage NFT and Crypto Risks
74	AI and Data Management
74	Artificial Intelligence(AI)
76	Data Management in Web3
77	Security Risks of AI in Web3
78	Security Risks of Data Management in Web3
79	Ethics, Privacy and Compliance
79	The Importance of Ethics, Privacy and Compliance
81	Major Areas of Ethics, Privacy and Compliance
82	Threats and Risks for Organizations and Metaverse Users
83	Recommendations or Solutions
84	IOT, Wearables, AR/VR
84	Internet of Things (IOT)
85	Wearable Technology
86	Augmented Reality/Virtual Reality
87	Security Challenges of IOT/Wearable/AR/VR/ Technology
88	Main Risks of IOT and other Connected Devices
89	Ways to Mitigate Risks of these Technologies
90	Phishing and Social Engineering Attacks

90	Phishing Attacks
91	Social Engineering Attacks
92	How Cybersecurity Experts can prevent Phishing Attacks
93	How Cybersecurity Experts can prevent Social Engineering Attacks
94	Fraud and Crime
95	Common Identity Theft and Cybercrime cases
96	Risks of Operating in the Metaverse
98	Consequences for companies
99	Recommendations or Solutions

5**CRD 5 - Metaverse Security Countermeasures**

101	Identity Management
102	Wearable Devices Management
104	Data Management
106	Privacy Enhancement
109	Situational Awareness
110	Open and Decentralized Creator Economy
112	Physical Safety
113	Social Management
114	Digital Governance
